Developmental Framework – Legend Guide

Column Interpretation:
. Early: Baseline defect at D35 (mutant vs control)
. TrajDev: Trajectory deviation (mutant maturation vs normal)
. Late: Final outcome at D65 (mutant vs control)

Time_Ctrl Marker (gray triangle .):
. Shows normal maturation direction in TrajDev column
. Reference: How control cells change from D35 to D65

SuccessScore Annotations (right of Late column):
. = Improvement: |Late| < |Early| (defect reduced)
. = Worsening: |Late| > |Early| (defect increased)
– = Unchanged: |Late| . |Early| (persistent defect)

Significance Indicators:
. Dot size = significance (–log10 FDR)
. Black outline = FDR < 0.05
